

## Simple GCP Filestore POC

### Validation in fileshare

1. Tested with sample data. Data's are still persist, while we recreate the containers at multiple times.
2. Tested with "500" user, able to modify the content.
3. Validated the directory USER and GROUP permissions are the same.

### Validation in Disk

1. Able to sync the sample data using **rsync** command.
2. Data's are still persist, while we recreate the containers at multiple times.
3. Validated the directory USER and GROUP permissions are the same.
4. Validated the fsGroup permissions are reflected in mount path.
